

Initial Convenience Service (ICS)

On 10 April 2014, the NPP Program commenced the evaluation of ICS PQQ responses submitted to validate the suitability of potential ICS providers to design, build, implement, operate and maintain the ICS.

The Program has now completed the evaluation of PQQ responses. The outcomes of the pre-qualification process have been endorsed by the NPP Steering Committee.

The NPP Steering Committee wishes to thank all providers for the time and effort given in preparing their responses.

All providers, successful and unsuccessful, have been notified of their outcome from the evaluation and the ICS RFP Process has commenced.
