

Application for Registration of Devices, Solutions and Non-Standard Technology

Devices, Solutions and Non-Standard Technologies must be registered with AusPayNet to become approved for use in the Issuers and Acquirers Community. The registration process is set out in the [IAC Device Approval Process \(DAP\)](#). There are two pathways available to obtain registration:

- registration with Attestation of Compliance (**AOC**) (see DAP Part 3); or
- for Devices, Solutions or Non-Standard Technologies which do not hold a valid AOC, registration via Structured Risk Assessment (**SRA**) (see DAP Part 4).

To apply for registration: submit this application together with the PCI Attestation of Compliance (if applicable) to PAG@auspaynet.com.au.

By submitting this Application for Registration, the Device Approval Applicant agrees to comply with the terms of the DAP and that they have authority to submit the Application.
